Mr. Srihasak Arirachakaran, Director and Chief Executive Officer, was assigned to briefly report to the shareholders on the operating results of the past year 2018, which is still considered in good standard as the coal business, which is a core business, and the ethanol-for-fuel business, which is the secondary core business were still profitable, despite the fact that coal prices had started to decline during the second half of 2018 as global economy began to slow down. Additionally, the Indonesian Government policy has become more stringent (Domestic Market Obligation), which stipulates higher portion of coal supply to the domestic consumers with lower selling price than that of export. As for the overall operating results in 2018, the Company had a total revenue of Baht 12,573.40 million with the net profit derived from shareholding proportion of Baht 600.68 million or net earnings per share of Baht 1.14. In comparison with year 2017, the revenue increased by Baht 437.77 or 3.61 percent but the net profit decreased by Baht 41.95 million or 6.53 percent. The revenue proportion from the sales of coal and ethanol accounted for 78.49 percent and 21.51 percent with the net profit proportion from the coal business and ethanol business of 75.01 percent and 24.99 percent, respectively.

Operating Results

For the operating results of the coal business, which is the core business, the total revenue in 2018 was Baht 9,839.13 million, an increase from the previous year by Baht 229.46 million or 2.39 percent with the net profit of Baht 753.58 million, a decrease from the previous year by Baht 329.54 million or 30.43 percent. Even though coal sales volume increased by 9.22 percent but the average coal selling price decreased by 6.25 percent due to the decrease in global coal prices during the second half of 2018. Currently, there are two coal mining concessions in operation in Indonesia with total coal production capacity of approximately 6 million metric tons per year.

Although the global coal prices have continued to rise from 2017 according to the Newcastle Export Index but the coal prices according to Indonesian Coal Index (“ICI 4”) that PT. Lanna Harita Indonesia (“LHI”) and PT. Singlurus Pratama (“SGP”), subsidiary companies in Indonesia, use as reference price index for the sale of coal in Indonesia as well as for export has declined significantly especially in the second half of 2018, as global economy began to slow down. Additionally, the Indonesian Government policy has become more stringent such as its policy on the Domestic Market Obligation (“DMO”), which stipulates higher portion of coal supply to the domestic consumers with lower selling price than that of export, the profit of coal business in 2018 therefore decreased as compared with 2017.

For the operating results of the ethanol-for-fuel business, which is the secondary core business, the total revenue in 2018 was Baht 2,696.08 million, an increase from the previous year by Baht 225.56 million or 9.13 percent due to the increase in ethanol sales volume of 18.09 percent but average ethanol selling price decreased by 7.58 percent with the net profit of Baht 294.28 million, an increase from the previous year of Baht 245.42 million or 502.33 percent due to the decrease in cost of ethanol sales of 13.88 percent as molasses price, which is raw material and major cost of ethanol production, decreased from the previous year by 17.97 percent. The ethanol production plant, which is located in Dan Chang District, Suphanburi Province, consists of two ethanol production lines with a total production capacity of 350,000 liters per day, mainly utilizing molasses as the main raw material. Both ethanol production lines have been granted special investment promotion privileges according to the Investment Promotion Act, B.E. 2520. However, the investment promotion certificate of the Ethanol Production Line No. 1 has expired on January 30, 2013 and the investment promotion certificate of the Ethanol Production Line No. 2 will be expired on April 1, 2020.

The overall financial position in 2018 was in good standing having the total asset as at the end of 2018 of Baht 9,645.72 million, an increase from the previous year of Baht 871.12 million or 9.93 percent and the total liabilities as at the end of 2018 of Baht 3,729.87 million increased from the previous year by Baht 763.47 million or 25.74 percent. The total shareholders' equity as at the end of 2018 of Baht 5,915.85 million increased from the previous year by Baht 107.65 million or 1.85 percent, resulting in an increase in the book value from Baht 8.10 per share in 2017 to Baht 8.31 per share in 2018, an increase of Baht 0.21 per share or 2.59 percent.

The overall liquidity in 2018 was also considered in good standing with the current ratio as high as 1.61 times with the total debt to total asset ratio was only 38.67 percent and the total debt to equity ratio was only 63.05 percent. In addition, the Company has cash flow and credit facilities from financial institutions that are sufficient for business operations and future investments.

The overall earnings efficiency of the Company in 2018 was considered in good standing, with EBITDA slightly decreased from 35.03 percent in 2017 to 34.04 percent in 2018, the EBITDA margin decreased from 20.78 percent in 2017 to 18.22 percent in 2018, the net profit margin decreased from 9.33 percent in 2017 to 8.33 percent in 2018 and the return on equity decreased from 15.35 in 2017 to 13.94 percent in 2018.

The Company gives priority to the principles of good corporate governance and realizes the importance of corporate social responsibility to create sustainable development for the corporation in the long run, as well as being committed to promoting anti-corruption in every form. Accordingly, the Company has received the following rewards and recognitions in 2018:

(6) PT. Lanna Harita Indonesia, subsidiary company with coal mining operations in Indonesia received the awards in 2018 from the central and local government of Indonesia for their excellent environmental management in compliance with the environmental management standards and relevant laws.

(7) PT. Singlurus Pratama, subsidiary company with coal mining operations in Indonesia received awards in 2018 from the central and local government of Indonesia for their excellent environmental management in compliance with the environmental management standards and relevant laws, and received “Zero Accident Awards” from the Ministry of Labor and the Governor of East Kalimantan Province for having zero accident from the period between January 1, 2009 until December 31, 2017.

The Company has planned and set investment goals in various projects as follows:

(1) The Company has prepared to invest in the third coal mining concession of PT. Pesona Khatulistiwa Nusantara in Indonesia, currently operating two coal mining concessions with total coal production capacity of 3.5 million metric tons per year. In addition, the Company is still seeking for new investment opportunities in coal mining concession in order for the Company to expand its production and distribution capacity in the future.

(2) Thai Agro Energy Public Co., Ltd., a subsidiary company, is currently under a construction of the spent wash evaporation plant utilizing an evaporation system process for bio-methanated spent wash with capacity of 3,000 cubic meters per day, to be completed within the 1st quarter of 2019. This project is deemed an effective and sustainable solution for treatment of wastewater from the ethanol production process, which is in line with Company’s policy. In addition, water resource consumption can be significantly reduced by over 90 percent as water condensation from the spent wash evaporation process can be reused for ethanol production process and excess electricity power produced from this project can be used in the ethanol production plant, resulting on electric energy saving. Furthermore, a by-product, which is the potassium humate, shall be derived from this spent wash evaporation process at approximately 50,000 metric tons per year, which can be sold for additional revenue and profit

(3) Lanna Power Generation Co., Ltd., a wholly-owned subsidiary company, has entered into the memorandum of understanding with PT. Indonesia Power, a state enterprise of Indonesia, to conduct a feasibility study and jointly invest in a coal-fired power plant project in Indonesia, by which the Company and subsidiary companies certainly have potential to invest in such project having existing coal mining concession. In addition to the increase in coal production and distribution capacity, the return on investment from such power plant will be received. Moreover, the Company is negotiating for more investment opportunities in other renewable energy projects in both domestic and overseas such as bio-energy, etc., which could yield higher revenue and profit in the future.

The Company expected that coal is still the world’s primary fuel with increase in consumption rate every year, especially in the Southeast Asia region, due to the fact that coal has abundant amount of reserves and is less expensive than other types of fuel. It is therefore expected that the operating results for the core business of coal and the secondary business of ethanol-for-fuel shall continue to be profitable in 2019, especially with the reduction in molasses price, which is the main raw material and major cost of ethanol production.

The Board of Directors has endeavored to manage and resolve any difficulties with prudence and diligence by adhering to good corporate governance principles, having allowed the Company to get through any obstacles and maintain good operating results, which enables the Company to pay dividend to the shareholders at high level every year. Accordingly, the Board of Directors shall continue to consider business expansion for sustainable development of the Company in long term.

Afterward, the Chairman provided opportunity for the shareholders to express opinion and make inquiry or suggestion to the Board of Directors concerning with the aforementioned Company's management and operating results.

Ms. Sudaporn Tantithaveevudt, proxy from Mr. Gilbert N. Vong, with meeting attendance registration no. 253, inquired that whether China and India are the only major customers in coal market or the coal market will be expanded to other countries.

Mr. Srihasak Arirachakaran, Director and Chief Executive Officer, clarified that the coal quality of the Company currently has, consists of medium and low calorific value, by which most customers who use such quality of coal are customers in China and India. If the Company produces coal with higher calorific value such as at the coal mine of PT. Singlurus Pratama ("SGP") that is preparing to produce coal with higher calorific value of approximately 4,800 kcal/kg, the Company shall expand its customer base to East Asian countries with the demand for such quality of coal. Accordingly, the expansion of the customer base depends on the quality of coal and the Company shall create the market that is suitable and conforms with the coal quality in order to obtain the value or best price for the coal.

Ms. Sudaporn Tantithaveevudt, proxy from Mr. Gilbert N. Vong, with meeting attendance registration no. 253, inquired about the reason that Siam City Cement Public Co, Ltd. ("SCCC"), a major shareholder and customer of the Company, bought significantly less coal from the Company in 2018 than the previous year.

Mr. Srihasak Arirachakaran, Director and Chief Executive Officer, clarified that the cement production requires coal in a variety of qualities including high, medium and low calorific values. The Company can only supply coal with low to medium calorific values without having coal with high calorific value; therefore, SCCC has to import coal with high calorific value from other sources, resulting in SCCC buying less coal from the Company in 2018.

Ms. Sudaporn Tantithaveevudt, proxy from Mr. Gilbert N. Vong, with meeting attendance registration no. 253, inquired further that whether the Company has any coal that meets the requirements of SCCC.

Mr. Srihasak Arirachakaran, Director and Chief Executive Officer, clarified that the Company is unable to produce coal that meets all the requirements of SCCC since the coal mining concessions of the Company has limitation with not much coal reserves remaining for the high quality coal.

Ms. Sudaporn Tantithaveevudt, proxy from Mr. Gilbert N. Vong, with meeting attendance registration no. 253, inquired further that whether the new government of Indonesia will change the policy in establishing ceiling price for coal being sold to the coal-fired power plants in Indonesia not exceeding the reference price index of USD 70 per metric ton.

Mr. Srihasak Arirachakaran, Director and Chief Executive Officer, clarified that such policy on setting coal ceiling price of the government of Indonesia will be effective until the end of 2019 and the newly elected government will consider the policy again, which should become clear after the formation of the new government of Indonesia. Accordingly, this policy has an effect on the coal selling price being exported from Indonesia as well. Although the Company uses global coal price index such as the Newcastle Export Index as a reference price for selling coal, but currently, coal is still a buyer's market; as a result, the Company cannot set higher coal selling price or close to the global coal price index, especially, when coal suppliers in Indonesia want to increase coal export volume to compensate for the declining domestic coal prices, thus resulting in more competition in coal prices.

The Shareholders' Meeting acknowledged the report of the Board of Directors on the operating results of year 2018 as presented above.

Agenda No. 8 : Consideration of Other Matters

Mr. Somkiart Limsong, Chairman of the Board, provided an opportunity for the shareholders to make inquiries, express their opinion and give suggestions to the Board of Directors concerning the operations of the Company (if any).

Mrs. Malee Kitvekin, shareholder with meeting attendance registration no. 225, inquired that in addition to having coal business as the Company's main business, whether the Company has any plan and policy to engage in other relating businesses. There has been concern over coal consumption trend that it would be declining due to environmental impact issue; therefore, the inquiry was on how the Company plans to expand the coal business in order to maintain profitability and continue to pay dividend at good level as in the past years.

Mr. Srihasak Arirachakaran, Director and Chief Executive Officer, clarified that the Company currently has two types of businesses, namely, the coal business in Indonesia and ethanol-for-fuel business in Thailand. The coal business is the main business that the Company has been operating since it was founded back in 1985. The Board of Directors has established direction and policy for the Company to reduce risks involving with the coal business in Indonesia and to increase business in energy sector in Thailand. Accordingly, the Management is under selection process for additional investment projects by considering the best interest of the shareholders, including the stability and sustainability of the Company in the future. The shareholders shall be presented with these investment projects when they have become more definite. As for the issue on lower consumption of coal due to issues concerning environmental impact, according to relevant information, it is found that actually the coal consumption growth rate that has become lower, not the coal consumption level itself, which is actually still growing in line with the increase of global energy consumption. It is the hydrocarbon type of energy that would be replaced due to high cost with similar environmental impact concern. Concerning with business expansion to increase revenue and profit, the Board of Directors has already established that in every case of investment, either in Thailand or overseas, the return on investment must be at a good and appropriate level. Feasibility studies must be thoroughly conducted before any investment is made. The shareholders should be confident that the Company would find way and opportunity to invest in the new businesses and it is anticipated that there new investment projects will be materialized very soon.

Mr. Taweachat Chulankul, shareholder with meeting attendance registration no. 238, inquired about the progress of investment projects in power plant business which were presented last year and also as described within the Annual Report 2018 that the Company would be required to divest its shareholding proportion in the subsidiary companies operating coal business in Indonesia according to the laws of Indonesia, whether the coal price reflects share prices of the subsidiary companies that the Company must divest its shares and how this would compare with current prices, and whether the sale of coal business and the investment in the power plant business in Indonesia have similar proportion or how much different..

Mr. Srihasak Arirachakaran, Director and Chief Executive Officer, clarified that the Company has invested in the third coal mine concession, by which project consideration period has been extended for one more year until the end of this year in order to be more certain on such investment, especially concerning with the policy of the newly elected Indonesian Government, and as strong as Company's current and profitable coal mining operations. As for the investment in power plant business, the Company is currently working on two projects including (1) a 55-MW mine-mouth coal-fired power plant project that is located within 20 kilometers from the subsidiary company, PT. Singlurus Pratama ("SGP") and (2) a 200-MW coal-fired power plant project, which is part of the power expansion plan in East Kalimantan province by the Indonesian government, in which the project should become clear by the end of this year or next year. Accordingly, the Indonesian government has specified that the commercial operation date for the 200-MW coal-fired power plant shall be within 2022 with 3-year construction period. As for the 55-MW coal-fired power plant project, discussion and negotiation have been carried out but with no clear conclusion yet. However, the construction of this project has already been completed and operation has commenced with distribution of electricity power into the system. Therefore, if the Company decides to invest in this project, additional revenue will be generated for the Company. As for the divestment of shares in the subsidiary companies with coal concessions in Indonesia, which will result in a reduction of revenue and profit due to reduction of shareholding proportion, whether it would be replaced by the investment in the power plant

business, more detailed studies are being conducted. Investment capital for acquiring shares in the 55-MW coal-fired power plant may be significant but the investment in the new coal mine concession should be carried out without incurring much debt. As for the sale of divested shares in the subsidiary companies in Indonesia according to the laws of Indonesia, cash income is expected which can be used for further investments. It is anticipated that maintaining good profit from the coal business will be more difficult in the future as the government of Indonesia has recently asserted nationalistic tone, resulting in lower domestic coal price than that of global coal prices. One way to maintain good profit will be to either add value to the coal such as selling coal to the power plants coupled with the investment in such power plants or move downstream, by which studies and consideration have been undertaken for more than three years. Therefore, the Company is considered to be at a significant time when the decision on divestment in the coal mine concessions in Indonesia has to be clear for the Company to move forward into the future.

Mr. Taweecat Chulangkul, shareholder with meeting attendance registration no. 238, further inquired about the progress and competition concerning with the tender for the coal procurement project with the Electricity Generating Authority of Thailand (“EGAT”), by which the Company had already been qualified at certain level and also on the progress of waste-to-energy project from municipal solid waste at provincial scale, including the project size.

Mr. Srihasak Arirachakaran, Director and Chief Executive Officer, clarified that EGAT’s coal procurement project is now under the current Energy Minister, whom has instructed EGAT to hold back the Krabi coal-fired power plant project for the time being, including another coal-fired power plant in Songkhla province, in order to explore the alternative energy first. Therefore, it is not yet certain whether EGAT can build such coal-fired power plants. Concerning with the waste-to-energy project from the municipal solid waste, after the National Council for Peace and Order has come into power, such waste-to-energy project initially became part of the National Policy; however, it has somehow faded afterwards. The Company initially conducted project study and thinks that the project can possibly be revived. Nonetheless, if such project is still based on the same process as before where bidding was for the municipal solid waste only, then the project is not interesting. The Company has aimed to invest in the solid waste treatment project that is sustainable in long term utilizing modern technology for waste treatment without requiring additional landfills. As for the Smart City project that the Company was interested in and carried out feasibility studies in several projects, although not much progress have been made but with recent changes in the form of Eastern Economic Corridor (“EEC”) project in the Eastern Region, in which the Company has also discussed with the EEC working group and if there is anything definite, it shall be reported to the shareholders for acknowledgment and consideration.

Mr. Taweecat Chulangkul, shareholder with meeting attendance registration no. 238, further inquired that if the Company decided to invest in additional projects in Indonesia, whether the Company would need to take out a loan for such investments and from which bank and what type of currency would be for such loan.

Mr. Srihasak Arirachakaran, Director and Chief Executive Officer, clarified that it is not necessary for the Company to obtain any loan for the investment at this time. Nonetheless, if the investment is in Indonesian Rupiah currency, the Company will consider taking out loan from financial institutions in Indonesia or from banks in Asia with operation in Indonesia with Thai banks included. As for investment in the power plants which normally involves export credit in US dollar term, associated risks will also be considered involving the power purchase agreement that will be in Indonesian Rupiah currency.

Mr. Somwang Phulsomabat, shareholder with meeting attendance registration no. 244, inquired whether the coal business would be good this year.

Mr. Srihasak Arirachakaran, Director and Chief Executive Officer, clarified that global coal prices have improved during the 1st quarter 2019 as compared with the 3rd and 4th quarter 2018, with coal price moving back to the level comparable with the middle of 2018, but not yet as good as in the past. As for coal prices in Indonesia, the pricing trend should be better in 2019, which should result in a slight improvement of Company's operating results. However, coal pricing trend for the following quarters will need to be monitored and the Company must make necessary adjustment as best as it can.

Mr. Somwang Phulsomabat, shareholder with meeting attendance registration no. 244, inquired that the Company used to pay dividend at almost 100 percent of the net profit in the past but this past year the Company only paid dividend at about 65 percent of net profit, and therefore he hoped that the Company would pay dividend and a higher rate this year.

Mr. Somkiart Limsong, Chairman of the Board, clarified that the Company has established the dividend payment policy as earlier described by the Chief Executive Officer. It should be noted that at certain years that the Company paid dividend at almost 100 percent of the net profit, the dividend was not such big amount as the net profit was considerably low. Nonetheless, the Company sympathizes with the shareholders and tries to pay as much dividend as possible but during the year that the Company makes considerable amount of profit, the dividend shall be paid according to the formula with certain amount being reserved for future investments for sustainable development of the Company and another part for dividend payment according to the established dividend payment policy. Therefore, it will not be possible to pay dividend from all or over 90 percent of the net profit every year.

Mr. Somwang Phulsomabat, shareholder with meeting attendance registration no. 244, stated that Company's operating results for each quarter are normally reported at almost the last day and inquired whether the operating results could be reported sooner.

Mr. Anun Louharanoo, Director and Risk Management Committee Chairman, clarified that the Company would try to make report it as quickly as possible at the next opportunity.

Mr. Somsud Man-anansap, shareholder with meeting attendance registration no. 200, inquired that on Page 99 of the Annual Report 2018, on the Notes Consolidated Financial Statements No.33, concerning the investment promotional privileges granted by the Board of Investment ("BOI") of Thai Agro Energy Public Co., Ltd., a subsidiary company, in which the first BOI certificate that was granted in 2005 for a period of 8 years should have been expired since 2013 and another BOI certificate that was granted in 2012 for a period of 8 years should be expired in the next 1-2 years. The inquiry was whether there would be another business that additional BOI certificate would be applied. In addition, according to his knowledge, for the company granted with BOI certificate, an external auditor is required to audit the financial statements being submitted to BOI, therefore whether the Company is required to pay audit fee for the audited financial statements submitted to BOI and how much, and if the Company does not receive the BOI certificate, whether such audit fee can be negotiated for lower amount of fee.

Mr. Anun Louharanoo, Director and Risk Management Committee Chairman, clarified that Thai Agro Energy Public Co., Ltd., a subsidiary company, operates two ethanol production lines or two ethanol production plants for fuel purpose. The certificate of BOI promotional privileges for the ethanol production line no. 1 has already expired since 2013 and BOI certificate for the ethanol production line no. 2 will be expired on April 1, 2020. As for future projects, if the project can be qualified for promotional privileges such as wastewater treatment project, the Company shall submit application for the promotional privileges with the BOI to protect the interest of the shareholders. The Company has already carried out this matter in every business granted with the promotional privileges. In the cases where external auditor is required to audit the financial statements submitted to BOI, there will be additional audit fee of Baht 100,000. If in the future, when BOI certificate expires and the Company is not required to submit the financial statements to BOI again, then there shall not be any audit fee incurred for this part.

Afterward, the Chairman inquired whether any person had any other matters for further consideration.

It appeared that there was no one proposing any other matter for consideration.

Therefore, the Chairman had expressed his appreciation to all the Shareholders for attending the Meeting and for all the suggestions received from the shareholders during this Meeting, by which the Board of Directors shall use them for consideration of future implementation.

The Chairman then declared the meeting closed. The total number of meeting attendants was 311 persons, holding 429,183,080 shares, or 81.7492 percent of all the issued shares with voting rights.

The meeting was closed at 16.32 hrs.
