Mr. Vanchai Tosomboon, Chairman of the Meeting, presented the Report of the Board of Directors on the operating results and financial status, including other information of the Company and affiliated companies during year 2022, which had been printed in the Annual Report 2022 (Form 56-1 One Report Year 2022) and disseminated on the Company's website and forwarded to all shareholders in advance in QR Code format along with this meeting invitation. Mr. Srihasak Arirachakaran, Director and Chief Executive Officer, was assigned to briefly report to the shareholders on the operating results of the past year 2022, which is considered excellent as compared with 2021 and previous years. Following the coronavirus disease 2019 ("COVID-19") pandemic from 2019 until now, alongside the ongoing conflict between Russia and Ukraine, the energy and logistics sectors have encountered disruptions in their supply and demand chains. These events have also adversely affected the Company's business operations. Nevertheless, driven by a far-reaching vision, effective management and cross-functional administration, together with the cooperation of our employees at all levels, the Company has successfully overcome various challenges during the year 2022. As a result, the Company's operating results in 2022 achieved a total revenue of Baht 25,269.46 million, an increase from 2021 of 59.38 percent, and a net profit of Baht 2,960.63 million or Baht 5.64 per share, an increase from the previous year of Baht 1,385.39 or Baht 2.64 per share accounted for 87.95 percent, which is the highest net profit the Company has recorded since its establishment in 1985, having a net profit margin of 19.36 percent, an EBITDA margin of 35.20 percent, and return on equity of 45.13 percent, which is considered excellent. In addition, the book value as of the end of 2022 was Baht 14.16 per share or an increase of over 30.75 percent from the previous year.

The operating results of the coal business in year 2022, which is the core business, had a total revenue of Baht 23,164.66 million, an increase from the previous year of Baht 9,637.49 million or 71.25 percent with the net profit of Baht 4,978.93 million, an increase from the previous year of Baht 2,203.59 million or 79.40 percent, with coal sales volume increased by 15.56 percent and the average coal selling price increased by 48.20 percent. Coal prices continued to remain high as the war between Russia and Ukraine resulted in a surge in energy prices, leading to more demand for renewable energy. Additionally, the European Union (EU) expanded sanctions against Russia, causing the EU to buy more coal to replace Russian gas imports. Moreover, other countries such as Korea, Japan, India planned to increase coal stocks for winter in order to reduce natural gas imports that were a lot more expensive, resulting in the rising coal prices in the global market in line with the increasing demand for coal.

The global coal prices situation according to the Newcastle Export Index and the coal prices according to Indonesian Coal Index (“ICI 4”) that PT. Lanna Harita Indonesia (“LHI”) and PT. Singlurus Pratama (“SGP”), subsidiary companies in Indonesia, use as the reference price index for the sales of coal in Indonesia as well as for export. Typically, coal is considered an energy commodity with relatively stable pricing trends. However, over the past few years, there has been a significant escalation in coal prices, which is an uncommon occurrence, and eventually, coal prices will adjust downwards to align with movements in fuel prices. But in year 2021, there has been a significant spike in coal prices. This was due to the global economy is undergoing a recovery phase as the easing of the coronavirus disease 2019 (“COVID-19”) has led to higher energy demand,

which has resulted in a rising coal prices from the 4th quarter 2020 through the year 2021, while the supply of fuel and logistics has remained relatively tight. In addition, the growing tensions between Ukraine and Russia in late February 2022 have emerged as a disruption in the energy supply chain, especially, the concerns of European countries about the availability of energy during the upcoming winter following the suspension of Russian gas deliveries. Accordingly, there was an increase in the utilization of coal fuel to supplement the electricity generation from existing power plants or reactivate the plants that were previously decommissioned due to policies aimed at reducing or eliminating coal fuel usage. As a result, it has become necessary to source coal from Indonesia and Australia, leading to a sharp rise in coal prices, in which the NEWC index reaching an all-time high in the 3rd quarter 2022. Although the ICI4 coal price index, which is used by LHI and SGP as a reference for coal sales in Indonesia and exports, did not increase as high as the NEWC index, the average ICI4 coal price index in 2022 has risen considerably by approximately USD 20 per metric ton from the previous year, which significantly enhance the performance of LHI and SGP in 2022.

Accordingly, the Company has strictly complied with the regulation regarding the Auditor Rotation as stipulated by the SEC, by changing the financial auditor every five accounting years.

Afterward, the Chairman provided opportunity for the shareholders to express opinion and make inquiry concerning the appointment of the auditor and determination of audit fee for year 2022 above.

Mr. Sakchai Sakulmontri, shareholder with meeting attendance registration no. 231, inquired the Audit committee whether there was any consultation with EY Office Limited on the potential utilization of Artificial Intelligence (“AI”) to assist in the audit process, as well as the readiness for such technological advancements in the future. As the amount of audit fee is dependent on the time required for the audit process. However, the implementation of AI has the potential to reduce working hours and expedite the audit process. Although the audit fee for year 2023 is the same as in the previous year, the utilization of AI in the auditing process should not result in any increase in auditing fee in the future. As an example, some audit firms have integrated AI into their auditing process, which demonstrates that such company has implemented measures to utilize AI to reduce the duration of work and lower the cost of the services. However, it is still unclear how EY Office Limited will respond to this trend, as the Audit Committee has not yet mentioned any specific information regarding the use of AI.

Mr. Adul Tantharatana, Audit Committee Chairman, clarified that the Audit Committee has not yet discussed with EY about the implementation of AI in the audit of the Company. This year, the Company must prepare the Annual Report in the form of 56-1 One Report, resulting in an increase in workload for EY Office Limited. Nevertheless, the auditor did not increase the audit fee. Accordingly, the Company has considered and concluded that it is appropriate to continue engaging EY as an auditor of the Company. Regarding the integration of AI, the Audit Committee will review this matter in collaboration with EY Office Limited in the following year.

Accordingly, it is imperative to amend Article 20, Article 22, Article 23, and Article 24 of the Company’s Articles of Association in order to conform with the revised legal provisions according to the Public Limited Companies Act (No. 4), B.E. 2565, dated May 23, 2022.

Agenda No. 10: Consideration of Other Matters

Mr. Vanchai Tosomboon, Chairman of the Meeting, provided an opportunity for the shareholders to make inquiries, express their opinion, and give suggestions to the Board of Directors concerning the operations of the Company (if any).

Mr. Thanyalak Sitthikraisorn, shareholder with meeting attendance registration no. 193, inquired as follows:

(1) Coal prices, sales volume, revenue, and profit margin during the first three months of 2023, whether they have remained stable, increased, or decreased.

(2) What is the Company's investment plan for new projects in 2023.

(3) What is the outlook for the Company's coal business over the next 5-10 years.

Mr. Srihasak Arirachakaran, Director and Chief Executive Officer, provided a preliminary clarification as follows:

(1) The Company is presently unable to provide an update on the Company's performance during the first quarter 2023. Nonetheless, a comparison with its performance during the same period last year appears to be at similar level. Currently, the Newcastle Export Index (NEWC) of Australia is below USD 180 per metric ton, from previous high of USD 420 per metric ton in the 3rd quarter 2022. However, the price of Indonesian coal, produced and distributed by the subsidiary companies, has not adjusted as much as the Australian coal price. Therefore, the sales volume in the 1st quarter 2023 remains good. As for the 2nd quarter 2023, the coal price tends to decrease following the Australian coal price, causing customers to delay their coal purchase and delivery. To mitigate this issue, the Company has a comprehensive coal delivery plan, and the Management is closely monitoring the situation to evaluate operational guidelines regularly on a monthly and quarterly basis. Regarding profitability, it is anticipated that trading volume in Europe this year may not be as high as the previous year. Nevertheless, the sales volume is projected to remain stable in Asia, as China has resumed importing Indonesian coal due to its low calorific value, while Australian coal has high calorific value, therefore, the sales volume should not be affected. However, the decline in the prices of NEWC index and oil during this period may hinder the Company's performance and achieving lower than the previous year. Nonetheless, the Management is committed to its efforts in sustaining profitability for all shareholders.

(2) As for inquiries No. (2) and No. (3), the overview of the Company's investment plans can be categorized into two segments: (1) the coal business, and (2) other businesses, which are non-coal businesses. With regard to coal business, despite an anticipated decline in coal consumption in the future, there will still be a demand for coal, in which those users will need to adopt carbon capture technologies in their organizations. Furthermore, there is no expected entry of new coal producers, and thus, coal reserves or supplies are unlikely to increase. In the short and medium term, the demand for coal in Europe and the United States are expected to decline due to their readiness to adopt carbon capture technologies. On the other hand, Asian countries are likely to maintain a considerable demand for coal, despite lagging behind Europe and the United States by approximately 15 years in carbon capture technology adoption. However, Indonesian coal produced by subsidiary companies is considered to be of low production cost and the production process has relatively low carbon emission. In this regard, the Company is studying carbon taxation as coal is a fossil fuel that emits carbon, which adversely affects the environment. Accordingly, it could be concluded that the Company will continue operating coal business as its core business, while exploring investment opportunities in new coal production sources, which is expected that there will be fewer competitors in the future. Nevertheless, the completion of several coal-fired power plants in the past five years will generate a demand for coal for the next 20 years. Therefore, the Company

is able to fully utilize its existing coal resources and still has sufficient coal reserves. As for the investment in new coal production sources, the Company must consider the impact on stakeholders in all aspects and aim to maximize benefits for the Company and its shareholders. As for other businesses, which are non-coal businesses, it was disclosed during the Annual General Meeting of Shareholders Year 2022 that the Company had expressed interest in solar energy, which would enable the Company to reduce its carbon footprint, and ultimately achieve a net-zero goal. However, the specific net-zero target is unable to be announced at this time. The calculation of carbon footprint of the Company's operations in Thailand has been completed and is now seeking to work with its affiliates and subsidiaries overseas to determine the carbon footprint of the entire organization. Once the total carbon footprint has been identified, the Company will announce its strategy for offsetting greenhouse gas emissions to achieve carbon neutrality, and then set goals for achieving net-zero target. As part of its operational plan to achieve carbon neutrality and net-zero emissions, the Company plans to implement renewable energy solutions over the next three years, such as solar power plant projects in Thailand or neighboring countries, as well as wind power plant projects in Indonesia, etc.

In addition, the Company's operations are conducted in compliance with the concept of sustainable organizational development or ESG principles, which comprises Environmental, Social, and Governance. To achieve this objective, the Company has enhanced the roles and responsibilities of the Corporate Governance Committee, by appointing as the ESG Committee, which enables to align practices with the ESG principles in the most appropriate manner, to the best of the Company's ability.

Afterward, the Chairman inquired whether any person had any other matters for further consideration.

It appeared that there was no one proposing any other matter for consideration.

Therefore, the Chairman had expressed his appreciation to all the Shareholders for attending the Meeting and for all the suggestions received from the shareholders during this Meeting, by which the Board of Directors shall use them for consideration of future implementation.

The Chairman then declared the meeting closed. The total number of meeting attendants was 241 persons, holding 348,530,707 shares, or 66.3868 percent of all the issued shares with voting rights.

The meeting was closed at 16.47 hrs.
