Mr. Srihasak Arirachakaran, Director and Chief Executive Officer, was assigned to briefly report to the shareholders on the operating results of the past year 2023, which is considered excellent. Despite encountering challenges from the ongoing effects of the coronavirus disease 2019 ("COVID-19") pandemic and disruptions caused by the Russia-Ukraine conflict, particularly affecting the energy and logistics supply chains. Additionally, the shifting global and regional political risks, along with economic fluctuations impacting energy consumption across Europe, the United States, and Asia, have all directly influenced the Company's operations. Nevertheless, our teams in Thailand and Indonesia have demonstrated remarkable collaboration and steadfast unity. Combined with the profound knowledge, expertise, and management skills of our executives, we have successfully overcome these obstacles, and guided the Company towards its objectives. In 2023, the Company achieved a total revenue of Baht 22,978.25 million, a net profit of Baht 2,088.11 million, with an EBITDA margin of 29.47 percent, a return on equity of 26.88 percent, and the book value as at the end of 2023 of Baht 15.44 per share.

The operating results of the coal business in year 2023, which is the core business, had a total revenue of Baht 20,228.89 million, which decreased from the previous year by Baht 2,935.77 million or 12.67 percent. This was due to the increase in coal sales volume from the previous year of 10.10 percent, but the average coal selling price decreased from the previous year by 20.68 percent. The net profit derived from shareholding proportion of the Company in year 2023 was Baht 1,948.88 million, which decreased from the previous year by Baht 836.51 million or 30.03 percent. This was due to a significant decline in coal prices, and a reduction in China’s coal imports due to economic slowdown.

The global coal prices situation according to the Newcastle Export Index (“NEWC”) and the coal prices according to Indonesian Coal Index (“ICI 4”) that PT. Lanna Harita Indonesia (“LHI”) and PT. Singlurus Pratama (“SGP”), subsidiary companies in Indonesia, use as the reference price index for the sales of coal in Indonesia as well as for export. Typically, coal is considered an energy commodity with relatively stable pricing trends. However, over the past few years, there has been a significant escalation in coal prices due to the global economy is undergoing a recovery phase as the easing of the coronavirus disease 2019 (“COVID-19”) has led to higher energy demand, which has resulted in a rising coal price from late 2020 through 2021, with a significant increase during 2022. As a consequence of the ongoing tension between Russia and Ukraine since mid-2022, the overall coal market situation has been affected with the Newcastle coal price index (NEWC) having reached its peak at USD 434.02 per metric ton in September 2022, then the market subsequently experienced a sustained downturn throughout 2022 and into 2023, with prices falling to USD 357.75 per metric ton in January 2023 and dropping further to USD 129.15 per metric ton in June 2023. The remaining 2023, coal prices were fluctuating between the range of USD 160 to USD 120 per metric ton until the end of 2023. Coal prices in 2024 are anticipated to maintain stability, with the coal business expected to sustain profitability and satisfactory operating results.

The operating results of the ethanol-for-fuel business, which is the secondary core business, in year 2023, had total revenue from ethanol business and soil conditioner byproduct in year 2023 of Baht 2,644.78 million, which increased from the previous year by Baht 615.04 million or 30.30 percent. This was due to the ethanol sales volume and the average ethanol selling price in year 2023 increased from the previous year by 20.83 percent and 7.54 percent, respectively. The net profit derived from shareholding proportion of the Company in year 2023 was Baht 15.44 million, which increased from the previous year by Baht 54.18 million or 139.86 percent.

The overall financial position in year 2023 was in good standing having the total asset as at the end of 2023 of Baht 14,832.01 million, which decreased from the end of year 2022 by Baht 121.79 million or 0.81 percent, and the total liabilities as at the end of 2023 of Baht 4,162.08 million, which decreased from the end of year 2022 by Baht 1,109.96 million or 21.05 percent. The total shareholders' equity as at the end of 2023 of Baht 10,669.93 million, which increased from the end of year 2022 by Baht 988.17 million or 10.21 percent, with the book value as at the end of year 2023 of Baht 14.16 per share, increased from the previous year by Baht 3.33 per share or 30.75 percent, resulting in an increase of the share's book value from Baht 14.16 per share to Baht 15.44 per share, an increase of Baht 1.28 per share or 9.04 percent.

The overall liquidity in year 2023 was also considered in good standing with the current ratio as high as 2.91 times but the total debt to total asset ratio was only 0.28:1 times, and the total debt to equity ratio was only 0.39:1 times. In addition, the Company has cash flow and credit facilities from financial institutions that are sufficient for business operations and future investments.

The overall earnings efficiency of the Company in 2023 was still considered in good standing, with gross margin decreased from 57.90 percent in 2022 to 48.89 percent in 2023, the EBITDA margin decreased from 35.28 percent in 2022 to 29.47 percent in 2023, the net profit margin decreased from 19.38 percent in 2022 to 14.68 percent in 2023 and the return on equity decreased from 45.13 percent in 2022 to 26.88 percent in 2023.

In addition to devoting time to organizational management, the Board of Directors gives priority to the principles of good corporate governance and realizes the importance of corporate social responsibility to create sustainable development for the corporation in the long run, as well as being committed to promoting anti-corruption in every form, and also places great importance on employees, which are valuable resources to the Company, by implementing measures to prevent the spread of COVID-19, as well as ensuring safety and stability of employees.

Diversification plan and strategy have been established with prudence and discretion for the Company to earn good return on investment, as well as generate higher income and profit in the future, along with stable, quality and sustainable growth in long term.

Afterward, the Chairman provided opportunity for the shareholders to express opinion and make inquiry or suggestion to the Board of Directors concerning with the aforementioned Company’s management and operating results.

Mr. Virat Trongpitakkul, the proxy from the Thai Investors Association, with meeting attendance registration no. 194, stated that after acknowledged the Company's sustainability performance in 2023, it was delighted to see attention and progress in this area. Referring to other companies listed in international sustainability indexes and their aims to implement the Bio-Circular-Green Economy ("BCG") model into future business operations to achieve zero waste from upstream to downstream in the production process; therefore, would like to inquire whether the Company has any opinions or directions regarding BCG model.

Mrs. Sutida Saengmaneechai, the proxy for Mr. Prachuab Wannapruerk, with meeting attendance registration no.113, inquired about the Company's strategies to mitigate pollution, focusing on the reduction of carbon dioxide emissions to zero in the coming years, since the Company's core business is coal production and distribution, acknowledging its significant contribution to carbon dioxide accumulation and environmental issues, including greenhouse gas emissions, global warming, floods, melting polar ice caps, and rising sea levels, etc.

Mr. Srihasak Arirachakaran, Director and Chief Executive Officer, clarified that to achieve zero waste in the production process from upstream to downstream, it should be separated into two parts: coal and carbon dioxide emissions resulting from resource utilization. For coal, a product purchased by customers for incineration in cement plant or boiler operations, generates non-reusable ashes due to coal being a finite natural resource. Therefore, the Company focuses on gathering data on post-customer process waste to assess total waste generation and determine how to minimize it. As for carbon dioxide emissions from coal mining and transportation, they are targeted for reduction. For example, the Company's coal mine in Indonesia has transitioned its generator from diesel to electricity, reducing diesel consumption. Additionally, the Company is studying the use of electric trucks for coal transport, in accordance with the advancements in electric vehicle technology in the truck category, which may increase in the next 1-3 years. Regarding the secondary core business, ethanol, it is able to implement the BCG model as ethanol is classified as an environmentally friendly fuel. In addition, the Company may invest in other core businesses in the future, such as generating electricity from renewable sources like solar and wind energy, which has been communicated to shareholders over several years. The Company continues to explore opportunities to engage in bidding and investing in electricity production from renewable energy projects in Thailand. However, the direction in Indonesia will depend on the policies of the new Indonesian government. As for the Company's direction on the BCG model, the Company is aware of its current carbon footprint and is in the process of assigning its coal mines in Indonesia to proceed on this matter.

Mr. Somchai Rangrsisakolsawat, shareholder with meeting attendance registration no. 108, inquired about the current situation, progress, and future initiatives of Lanna Power Generation Co., Ltd. ("LPG"), and its relation to the Company.

Mr. Srihasak Arirachakaran, Director and Chief Executive Officer, clarified that LPG is a subsidiary company established with the aim of developing power plant projects in Indonesia, as the Company believes that if it operates a coal mine, it should oversee every aspect of the process from coal fuel acquisition to electricity generation. However, Indonesia currently requires that coal-fired power plants must be intended for use in smelter. Accordingly, LPG recently studied new businesses, specifically wood pellet production and distribution in southern Thailand. However, due to the coronavirus disease 2019 ("COVID-19") outbreak causing wood supply shortage, forcing the suspension of this business. Subsequently, LPG sought wood pellet business opportunities in Vietnam, with Vietnam's extensive tree planting. Nonetheless, unstable government policies and difficulties in maintaining wood pellet quality to meet high-end market standards, particularly for customers in Japan, South Korea, and the European Union ("EU"), and the local government of Vietnam will establish a state-owned companies to compete in the wood pellet trading market, which could potentially lead to issues between LPG and the Vietnamese government in the future; therefore, the project had to be suspended. At present, the Company is focusing on investments in renewable energy projects through LPG to differentiate its business from the Company, which mainly operates in the coal business, having potential difficulty for coal-related companies to secure green funding due to their business nature. In this regard, LPG's transition to renewable energy could positively impact both green funding and carbon credits for the Company.

Mr. Somchai Rangrsisakolsawat, shareholder with meeting attendance registration no. 108, inquired about the pricing mechanism for coal utilized by the Company.

Mr. Srihasak Arirachakaran, Director and Chief Executive Officer, clarified that the Company references the Indonesian Coal Index for pricing, with the average price during this period is varying between USD 40 and USD 65 depending on the calorific value ("CV") of the coal produced by the Company, which ranges from CV 3,000 to CV 4,000 kilocalories per kilogram (Kcal/Kg).

Mr. Thitipong Sophonudomporn, shareholder with meeting attendance registration no. 96, inquired about the strategy to manage risks associated with the duration of mining in Indonesia, where the Company operates two mines, and one of these mines will have its concession expire in 2031, and there is no indication in the Annual Report that the Company has current plan to acquire additional sources.

Mr. Srihasak Arirachakaran, Director and Chief Executive Officer, clarified that the Company's coal mines in Indonesia have been granted a total concession period of 30 years, with one mine expiring in the next seven years. If resources remain, the concession can be extended for another 10 years. In this regard, the Company has been actively pursuing this extension and continuously exploring new sources, utilizing our expertise in coal business operations. However, the search for new sources requires careful consideration of various factors, including carbon dioxide emissions from the Company's operations and the stringent lending policies of financial institutions. Nevertheless, shareholders can be assured of our commitment to find profitable new sources to benefit shareholders.

The Shareholders' Meeting acknowledged the report of the Board of Directors on the operating results of year 2023 as presented above.

Afterward, the Chairman provided opportunity for the shareholders to express opinion and make inquiry into any problem concerning with the financial statements of year 2023 above.

Mr. Sakchai Sakulmontri, shareholder with meeting attendance registration no 121, inquired about the ongoing conflicts in the Middle East, the Russia-Ukraine war, and neighboring countries of Thailand, as well as the impact of the volcanic eruption in Indonesia on the Company.

Mr. Srihasak Arirachakaran, Director and Chief Executive Officer, clarified that whenever conflict arises, it affects both the global economy and energy consumption. Despite the tense situation in the Middle East, the logistics system continues, which is advantageous for the Company as it contributes to the increase in product prices. However, the disruption in the logistics system could potentially impact product pricing. In business operations, it is important to uphold commitments made in the contracts and adhere to agreed-upon delivery schedules with customers. As for the war situation in Russia-Ukraine war and neighboring countries of Thailand, this does not affect the Company or energy consumption in Asia. Regarding the volcanic eruption in Indonesia, it occurred far from the Company's coal mines, which are situated in East Kalimantan. This location is advantageous as Kalimantan is an island without volcanoes. This is the reason why the Indonesian government is interested in relocating the capital from Jakarta on Java island to Nusantara on Kalimantan island, near the Company's coal mines.

Mr. Sakchai Sakulmontri, shareholder with meeting attendance registration no 121, inquired about the decrease in dividend income from Baht 2,600 million in 2022 to Baht 1,600 million in 2023.

Mr. Srihasak Arirachakaran, Director and Chief Executive Officer, clarified that despite a decline in revenue from the coal business, resulting in a reduction of profits and dividend payments by Baht 1,000 million compared to last year, the Company still managed to maintain profits within the range of Baht 1,000-2,000 million, which is considered only a slight decrease.

Agenda No. 9: Consideration of Other Matters

Mr. Vanchai Tosomboon, Chairman of the Meeting, provided opportunity for the shareholders to express opinion and make inquiry or suggestion to the Board of Directors concerning with the aforementioned Company’s management and operating results (if any).

Mr. Thitipong Sophonudomporn, shareholder with meeting attendance registration no. 96, inquired about bank deposits with restrictions, as specified in the Annual Report that overseas subsidiaries must set aside 30 percent as required by the Indonesian government, amounting to approximately USD 29.7 million or approximately over one billion baht, whether this is for retention purpose or if there is any potential for investment with such deposit.

Mr. Srihasak Arirachakaran, Director and Chief Executive Officer, clarified that the restricted deposit is a three-month deduction of 30 percent from export coal sales, as stipulated in the ministerial regulation enacted by the Indonesian government since August 2023, which remains in effect. Upon the arrival of the fourth month, the deposits deducted in the first month are returned. Theses deposits are deducted and transferred to the National Bank of Indonesia, where they can serve as collateral for loans in case of urgent financial needs. However, any difference in interest must be paid to the bank where the Company made the deposit.

Mr. Thitipong Sophonudomporn, shareholder with meeting attendance registration no. 96, inquired whether the Company conducts coal trading using currencies other than US dollars.

Mr. Srihasak Arirachakaran, Director and Chief Executive Officer, clarified that the Company pays contractors with Indonesian rupiah. While some contractors initially negotiate agreements in US dollars, payment is eventually made in the equivalent amount in Indonesian Rupiah. For example, when selling coal to power plants in Indonesia, where there is a requirement to allocate 25 percent of the total coal production volume each year for sales domestically, contracts are made in US dollars but paid in Indonesian rupiah.

Mr. Thanapoom Dettewandamrong, shareholder with meeting attendance registration no. 206, inquired whether the Company has plans to resume the wood pellet production and distribution project in Thailand. At present, there are issues with villagers burning and improperly disposing of leaves and branches. The Company may consider compressing the leaves and branches into wood pellets, thereby turning a crisis into an opportunity and earning carbon credits in return by reducing the amount of greenhouse gas emissions.

Mr. Srihasak Arirachakaran, Director and Chief Executive Officer, clarified that the Company has suspended the production of wood pellet in Thailand due to the lack of clarity on the wood supply chain. Additionally, the Company aims to avoid encouraging villagers to use improper methods to gather raw materials for sale. The selection of wood type in wood pellet production requires careful consideration, as failure to meet requirements may result in the product being classified as biomass fuel instead. Furthermore, clear policies from the government are necessary before the Company can reconsider this matter.

Mr. Thanapoom Dettewandamrong, shareholder with meeting attendance registration no. 206, inquired about the ethanol business and how the Company obtains raw materials, as the Company does not own sugar factory, therefore lacking cassava and molasses used in ethanol production.

Mr. Srihasak Arirachakaran, Director and Chief Executive Officer, clarified that the Company has been in the ethanol business for more than 10 years. During the beginning period, the Thai government implemented a policy in line with the Royal Project to promote fuel production for domestic consumption. At that time, the Company was the first and only entity in Thailand to receive a concession for this purpose. Despite lacking cassava and sugarcane raw materials for ethanol production, the Company's expertise in the energy industry enables it to serve as an intermediary, contributing to energy security. This has been demonstrated to shareholders that the ethanol business consistently generates considerable revenue and profit.

Afterward, the Chairman inquired whether any person had any other matters for further consideration.

It appeared that there was no one proposing any other matter for consideration.

Therefore, the Chairman had expressed his appreciation to all the Shareholders for attending the Meeting and for all the suggestions received from the shareholders during this Meeting, by which the Board of Directors shall use them for consideration of future implementation.

The Chairman then declared the meeting closed. The total number of meeting attendants was 209 persons, holding 20,851,696 shares, or 66.3868 percent attending the meeting in person, and 69 shareholders holding 307,902,386 shares granting proxies to attend the meeting for a total of 278 persons holding an aggregate amount of 328,754,082 shares or 62.6198 percent of all the issued shares with voting right.

The meeting was closed at 17.00 hrs.
